<p>3D VISION If you enjoy viewing erotic images, you will want to add this session to your collection of erotic hypnosis. Nikki's voice will lead you on a pleasant journey to a place where she will help train your mind to see these images in 3-dimensions of great detail, with more vivid colors, shadows, and textures. With repeated listening, you will find that erotic images almost take on a life of their own as they lift from the page or computer screen, and you will find yourself wanting to reach out to touch them. This session is a very nice complement to the Erotic Dreams session, because once your perception has been altered by Nikki's erotic training, your dream images will become more vivid and graphic as well. This session will be enjoyable for both women and men, and is not D/s related.</p>	<p>www.hypnofantasy.com</p>	<p>23:12</p>

<p>EROTIC DREAMS Many of us would love to have very graphic, vivid erotic dreams where we can experience our sexual desires in a safe, secret setting, but we just can't make that happen often enough for our liking. Also, many of us share the frustration of not recalling details of those erotic dreams that we do have - the seductive words, the sexy images and sounds all becoming lost in a misty fog upon awakening from sleep. This session will help you in both of these areas as your mind learns to treat you to sexy erotic dreams on a regular basis, and to have improved recall of that experience when you wake. The content of the dreams is up to your subconscious mind to determine because only you know what you find to be erotic and exciting. Consider experiencing this session in combination with 3D vision because you will find that they complement each other very nicely. This session will benefit both women and men who want to experience and recall their erotic dreams, and is not D/s related although D/s can certainly be incorporated into your dreams.</p>	<p>www.nikkifatale.com</p>	<p>29:20</p>

<p>INCREASE YOUR LIBIDO This script is written by ?? and recorded by Bob Brown Loss of the female libido (sexual desire) can lead to decreased intimacy for women with their partner, anxiety about sex and of course the loss of one of life's potentially most enjoyable experiences. Loss of libido in women may be driven by lifestyle causes such as stress levels, poor diet, or lack of exercise. Yet mind and body are always linked. Any loss of libido may be because you have tensed up recently, or been exhausted through overwork or other worries. It may be that you have experienced a recent lowering of self confidence which has 'carried over' into your sex life. So increasing your libido and enjoyment of sex will improve your overall health too.</p> <p>It's been rightly said that the biggest erogenous zone is the brain. <p>OVERCOME PREMATURE EJACULATION One of the most embarrassing problems for men is finishing too quickly during sexual intercourse, especially before he feels that his partner has been satisfied. This Hypnosis CD offers REAL solutions, using techniques that are simply ways of accessing the powerful, dynamic helper that is INSIDE OF YOU already- your Unconscious Mind.
